Career Objective:

➤ Motivated B.Tech Computer Science student with hands-on experience in Python, full-stack web development using Flask, Node.js, Express.js, and MongoDB, along with AI-based projects using OpenCV, DeepFace, and the Gemini API. Seeking an entry-level software development opportunity to apply my programming and problem-solving skills, contribute to real-world projects, and continuously enhance my technical expertise in a collaborative environment.

Education Details:

Education	Branch	Year of Passing	College/School	University/Board	Percentage
B-Tech (present)	CSE	2027	Ideal Institute of Technology, Kakinada	JNTUK University, Kakinada	70%
Diploma	Mechanical	2024	Aditya College of Engineering & Technology, Kakinada	SBTET	75.95%
SSC	-	2021	Suresh High School, Kakinada	State Board of Secondary Education	97%

Technical Skills:

Programming Languages:	Python (primary), C, Java (Basics).
Python Frameworks & APIs:	Flask, OpenCV (cv2), DeepFace, Gemini API.
Database:	SQL, MySQL, MongoDB.
Web Technologies:	HTML, CSS, JavaScript.
CS Fundamentals:	Basics of Programming, Computer Science Fundamentals.
Tools and Platforms:	VS Code, Git, GitHub.

Languages Known:

- English: Fluent (Speaking, Reading, Writing)
- Telugu: Native Language
- Hindi: Intermediate

Work Experience:

- Internship at MAHLE, Maraimalai Nagar, Chennai — Role: Trainee — Duration: 6 Months.
- Assisted in production operations at MAHLE during a 6-month trainee internship, gaining practical exposure to industrial workflows and manufacturing processes.

Main Projects:

Project Title: “MailTrace AI – Email Forensics & Phishing Analysis”	
Project Description:	- Built a full-stack web app that analyzes emails for phishing indicators, IP intelligence, relay tracing, and threat scoring. - Developed the Python (Flask) backend with SQLAlchemy and a React (Vite) frontend with a relay-trace map. - Added Tor and VPN/proxy detection using reverse-DNS keyword matching and IP geolocation via ipapi.co. - Tools used: Python, Flask, SQLAlchemy, React, Vite

Project Title: “AutoSage – AI Vehicle Diagnostics Assistant”	
Project Description:	• Built a Python application that analyzes user-described vehicle symptoms. • Used the Gemini API to identify probable causes, severity, and suggest next repair steps. • Tools used: Python, Gemini API
Project Title: “Face Expression Detection & Music Recommendation System”	
Project Description:	• Developed a Python system that detects facial expressions from webcam input and suggests songs based on emotions. • Used machine learning and image processing techniques. • Tools used: Python, OpenCV (cv2), DeepFace, Random module, Webcam
Project Title: “Campus Connect – Student Portal”	
Project Description:	• Built a full-stack campus portal with registration, login, a dashboard, and modules for attendance, results, notes, events, bus information, and placement preparation. • Developed a Node.js and Express REST API with MongoDB (Mongoose) to store user accounts and per-student portal records. • Added an analytics page with Chart.js charts and CampusBot, a chatbot powered by a locally run Ollama language model. • Tools used: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Mongoose, Chart.js
Project Title: “Nutrition Assistant”	
Project Description:	• Built a full-stack nutrition assistant with user registration, login, and meal management. • Tracked protein, carbohydrate, and fat intake with meal history and personalized nutrition guidance. • Tools used: MongoDB, Express.js, React, Node.js, Mongoose
Project Title: “Robotic Borewell Rescue System”	
Project Description:	• Designed a robotic system to rescue children trapped in borewells using a remote-controlled arm. • Implemented safe gripping and lifting mechanism for emergency operations.

Certifications:

- Python Full Stack Development with Project Virtual Internship – Eduskills.
- Google AI-ML Virtual Internship – Eduskills.
- Google Android Developer Virtual Internship – Eduskills.
- AWS Generative Virtual Internship – Eduskills.
- AWS Cloud Virtual Internship – Eduskills.
- DevOps & Cloud Automation Virtual Internship – Eduskills.
- Introduction to MongoDB.
- Google AI with IBM Cloud – By SmartBridge – Short-term (2 months).
- Google Cloud Generative AI – By SmartBridge – Long-term (6 months).
- Full Stack Developer MERN Stack – By SmartBridge – Short-term (2 months).

Place: Kakinada
